

How to configure Web Hosting plugin

Install WooCommerce plugin

In left-hand admin menu go-to **WooCommerce** → **Settings** and click on **Accounts** tab

In **Account Creation** Section if not checked
check **Automatically generate username from customer email**
check **Automatically generate customer password**

save changes.

Click on Checkout tab
In Checkout Section
Uncheck Enable guest checkout

save changes.

The screenshot shows the WordPress admin dashboard with the WooCommerce settings page open. The 'Checkout' tab is selected, and the 'Checkout Process' section is visible. A blue arrow points to the 'Enable guest checkout' checkbox, which is currently unchecked. The 'Coupons' section is also visible, with the 'Enable the use of coupons' checkbox checked.

Checkout Process

Coupons

- Enable the use of coupons
Coupons can be applied from the cart and checkout pages.
- Calculate coupon discounts sequentially
When applying multiple coupons, apply the first coupon to the full price of the cart.

Checkout 

- Enable guest checkout
Allows customers to checkout without creating an account.
- Force secure checkout
Force SSL (HTTPS) on the checkout pages (an SSL Certificate is required).

Web Hosting Plugin

Install Web Hosting plugin.

In left-hand admin menu go-to Web Hosting → Web Hosting

Web Hosting Settings

Call To Action Buttons

My-Account page

Domains

Domains Page: page URL where your Domain Checker Form is displayed e.g. /domain-checker/

Hosting Packages

Hosting Packages Page: page URL where your hosting packages are displayed e.g. /web-hosting/

Addons

Addons Page: page URL where your Addons are displayed e.g. /addons/

Fill in your Resellerclub account details.

Fill in your WMH details.

Call To Action Buttons

Domains Page: page URL where your Domain Checker shortcode [check_domain_name] is displayed e.g. /domain-checker/

when a visitor uses the domain name search form it will redirect to the page you configure here, on that page you will need to use shortcode [check_domain_name] to display the results.

Hosting Packages Page: page URL where your hosting packages are displayed e.g. /web-hosting/

Add-ons: page URL where your Add-ons are displayed e.g. /addons/

Woocommerce Continue Shopping Button In Cart: page URL where your products are displayed e.g. /shop/

Domains

In left-hand admin menu go-to Web Hosting → Domains

enter in the first box (Number of TLD to sell:) the number of TLD's you wish to sell then click save this will create the required number of boxes needed. Enter the TLD's and your selling prices. Click Save Changes again.

The screenshot shows the WordPress Admin Panel with the 'Web Domain Settings' page open. The left-hand menu is visible, with 'Web Hosting' selected and 'Domains' highlighted. The main content area shows the 'Top Level Domains' settings. A 'Save Changes' button is at the top. Below it, the 'Number of TLD to sell:' is set to 2. Two rows of settings are shown: 'TLD1: .biz' with a 'Selling Price' of £ 9.99, and 'TLD2: .info' with a 'Selling Price' of £ 8.99.

TLD eg .biz	Selling Price
TLD1: .biz	Price £ 9.99
TLD2: .info	Price £ 8.99

Shortcodes

Use shortcode `[wh_domain_form]` on any page post to display search domain name form. Use Widget WH Search Domain Form in any widget area to display the form

`[wh_transfer_domain_form]` used to create a transfer domain form on any page post. Use Widget WH Transfer Domain Form in any widget area to display the form

`[check_domain_name]` displays search domain name results

`[wh_wp_logout]` used to add logout link to any page post or widget.

My Account

[wh_extra_fields] Use shortcode on any page to show customer account details it's probably best to put this shortcode in my-account page this shortcode will display domain names, hosting packages, add-ons and allow customers to manage their domains.

If you are using Woocommerce v 2.6.0 or higher then create a new page called Control Panel with the parent page being My-Account and place the shortcode in this page.

Adding Hosting Packages

Just create your product as normal but you will need to add a custom field called package with a value called hosting. This is so the plugin can tell the difference between hosting products and domain products.

To view custom fields if its hidden click on Screen Options at the top of the page and check Custom Fields.

Web Hosting plugin also supports variable product prices ensure you use Cost as the Name: and £0.00 per month and £0.00 per year in the value(s): just replace £0.00 with your own prices.

 SKU: [?](#)

When naming hosting products the name must match your package name on WHM for example

package name on WHM = webuk_basic-shared-hosting

your product name = basic-shared-hosting

Invoices

Invoices will be automatically send. The default way is by using WordPress Cron this method is activated when the plugin is installed but does require at least 1 page visit per day to fire it.

If you think you will not get a page view every day then adding a Cpanel cron job and set common settings to once a day and add `wget "http://www.example.com/wp-content/plugins/web-hosting/cron.php"` as the command will overcome this.

Add a New Cron Job

Common Settings:	Once Per Day (0 0 * * *)	
Minute:	Once Per Minute (* * * * *)	✓
Hour:	Once Per Five Minutes (* / 5 * * * *) Twice Per Hour (0,30 * * * * *)	✓
Day:	Once Per Hour (0 * * * *) Twice Per Day (0 0,12 * * * *)	✓
Month:	Once Per Day (0 0 * * *) Once Per Week (0 0 * * 0)	✓
Weekday:	On the 1st and 15th of the Month (0 0 1,15 * * *) Once Per Month (0 0 1 * * *)	✓
Command:	Once Per Year (0 0 1 1 * *)	

Add New Cron Job

Current Cron Jobs

MINUTE	HOURL	DAY	MONTH	WEEKDAY	COMMAND	ACTIONS
0	0	*	*	*	wget "http://www.cpanel.co.com/hosting/wp-content/plugins/web-hosting/cron.php"	Edit Delete

The customer will receive an order and invoice in PDF format automatically. These new orders will be created the number of days in advance as specified in Admin->Web Hosting -> Orders invoicing section.

To change the default logo on order emails and invoices place your logo into the `www.yoursite.com/wp-content/plugins/web-hosting/images/` folder and name it `logo.png` image must be 100px X 100px in size.

Having problems then please email us at support@web-uk.co.uk
